

G8FEK SBA 23/21cm VLNA

Fast Radio Burst (FRB) project in progress at Owens Valley Radio Observatory, California

Jan 2017 ... Caltech have ordered 20 off SBA amplifiers for an installation of 10 times 4m dishes with dual polarisation feeds.

30dB gain L Band SBA amplifiers were selected against the competition for their repeatable and stable $<0.5\text{dB}$ noise figure in the presence of out of band interference from cellular and broadcast transmitters. *(photos show SBA in evaluation testing during 2016)*
